PROFESSIONAL SUMMARY

MCA student specializing in Artificial Intelligence and Data Science with hands-on experience in Python, Machine Learning, and Natural Language Processing (NLP) using Scikit-learn, FastAPI, and LLM/RAG pipelines with ChromaDB. Seeking an entry-level AI/ML Engineer role to build, train, and deploy models while contributing to data-driven projects in a collaborative team environment.

INTERNSHIP EXPERIENCE

AI/ML Virtual Intern — Maincrafts *20 June 2026 – 20 August 2026*

- Built a Customer Churn Prediction System using supervised Machine Learning algorithms (Logistic Regression, Random Forest) on behavioral and transactional data, applying data preprocessing, feature engineering, and exploratory data analysis (EDA) to improve model accuracy.
- Trained and evaluated models in Scikit-learn using accuracy, precision, recall, and F1-score metrics, translating churn-risk predictions into actionable business insights.

PROJECTS

NexaMind – AI Decision Intelligence Platform *on going*

- Architecting an AI-powered platform combining Large Language Models (LLMs) and a Retrieval-Augmented Generation (RAG) pipeline with structured data analysis to generate context-aware, explainable business recommendations while minimizing hallucination.

Technologies: Python, FastAPI, Ollama, ChromaDB, LLM, RAG, Embeddings.

ATSLens – AI-Powered ATS Resume Analyzer (https://atslens.netlify.app/)

- Developed an AI resume analyzer using TF-IDF and Cosine Similarity (90%+ accuracy) to compute ATS scores, extract PDF/DOCX content, identify missing skills, and generate downloadable reports via FastAPI.

Technologies: Python, FastAPI, Scikit-learn, TF-IDF, Cosine Similarity, SQLite, NLP, pypdf, python-docx, ReportLab, HTML, CSS, JavaScript.

Customer Churn Prediction System (ChurnAI App)

- Engineered a Machine Learning classification model to predict customer churn from behavioral and demographic data, enabling data-driven retention strategies.

Technologies: Python, Pandas, Scikit-learn, SQL.

TECHNICAL SKILLS

Programming Languages: Python, C, JavaScript, HTML, CSS.

AI/ML & NLP: Machine Learning, Supervised Learning, Classification, NLP, LLM, RAG, Embeddings, TF-IDF, Cosine Similarity, Semantic Similarity, Neural Networks (Basic).

AI/ML Frameworks & Tools: Scikit-learn, Ollama, ChromaDB, NLTK.

Backend, APIs & Databases: FastAPI, REST APIs, SQL.

Libraries: NumPy, Scikit-learn, NLTK, pypdf, python-docx, ReportLab.

Tools & Fundamentals: GitHub, VS Code, Data Structures & Algorithms (Basic), Object-Oriented Programming (OOP).

EDUCATION

Master of Computer Applications (MCA) — Artificial Intelligence & Data Science *Present*

Vidya University, Meerut, Uttar Pradesh

Bachelor of Computer Applications (BCA) *2025*

Chaudhary Charan Singh University, Meerut, Uttar Pradesh

CERTIFICATIONS

- GenAI Powered Data Analytics Job Simulation — Tata (Forage), 2026
- Exploring Machine Learning Methods, Algorithms & Tools — IBM SkillsBuild, 2026
- Python for Data Science — Infosys Springboard, 2026
- Microsoft Azure AI Fundamentals (AI-900) — Infosys Springboard, 2026

STRENGTHS & INTERESTS

Communication & Collaboration • Time Management & Problem Solving • Exploring Emerging AI Technologies.
